

30C/30CLS RANGE COMPRESSION GATE VALVES

Hattersley Figure 30C Hand-wheel and Figure 30CLS Lockshield Compression Ended Bronze Gate Valves offer the ultimate in dependable service wherever minimum pressure drop is important. Well established in the market, these valves are rated PN16 and are WRAS Approved for use with potable water.

Following a review of the range, we have made some modifications to the design.

Essentially, the valve is the same with the exception of some dimensional differences. Attached is a datasheet that contains the technical details for the revised range; the most notable difference being an increase in the face-to-face dimension which is shown in the table below. The range will have new part numbers, also shown in the table below. Prices do not change and Fig Numbers remain the same.

We will be in contact with you shortly to discuss any existing orders you have in place with us so we can agree a changeover plan to the new model.
